

PELA[®] Oil Extractors

The New Way To Change Oil

- No need to remove drain plugs
- Just pump 10 to 20 times in a row to create a powerful vacuum
- Then watch the oil drain neatly into the container

Quick, Easy & Clean Oil Changes

Available Models :

PELA 2000 Oil Extractor 2.5 L (2.6 qts)

A mini version of our popular PELA 6000. Designed for those who have small jobs but who don't want to pay the higher prices of our bigger pumps. Ideal for small 4-stroke outboards up to 50 HP and sailboats with small diesel engines (9 HP to 18 HP). Just pump 5 to 10 times in a row to create a powerful vacuum. Then watch the oil drain into the container. Pump is removable.

PL-2000

PELA Pro 14 Oil Extractor 14 L (14.8 qts)

Finally, a unit designed for bigger engines. With a 14 liter capacity, this pump is the largest on the market. New improved mechanism. Heavy duty construction with the pump housed inside the container. Just pump 20 to 30 times in a row to create a powerful vacuum and then watch the oil drain out. An essential tool for technicians.

PL-14K

PELA 6000 Oil Extractor 6.0 L (6.34 qts)

Our most popular pump. Compact yet powerful and affordably priced. With a large 6 liter capacity, it meets the needs of most boaters. Just pump 10 to 20 times in a row to start the vacuum. Sold to boaters around the world since 1998.

PL-6000

Big PELA Oil Extractor 6.5 L (6.87qts)

Our original pump. A long time favorite among technicians because of its power and durability. Also the choice of boat owners who want the best. Just pump 4 to 15 times in a row.
